

A Testimonial for Arthur Gerstein.

It is with great excitement and enthusiasm that I have the opportunity to speak about a gentleman who has creatively taken photography and color and intertwined it with the aspects of both Art & Science. Arthur Gerstein, has created an art form in which color present itself in a relationship between the aesthetic qualities of sensual gratification and inspirational healing.

It is generally not disputed that ultra violet light processes colors in various light frequencies. These light frequencies or color vibrations can affect us. Even in conventional medical practice, light is used in the treatments of certain conditions. In Arthur's creative work, the artistic properties of his primary colors with their corresponding vibrational light frequencies have the delightful quality of affecting you most positively and providing an inspirational and healing presence.

I sincerely enjoy knowing Arthur and enjoying his artistic creativity and skill.

Thank you and respectfully submitted,
